TRANSCRIPT OF ACADEMIC RECORDS
DIOGO LUÍS BOTELHO SILVA

Date of birth:	23.08.2006
Date issued:	23.10.2026
Passed Selection in:	09.2025
Core Curriculum started on:	20.10.2025
Core Curriculum completed on:	in progress

Core Curriculum

Name	Details	Grade*	Workload
rank 0			
Libft	Reimplementation of key C standard library functions and custom utilities.	125	70 H
rank 1			
ft_printf	Custom printf using variadic functions and format specifiers in C.	100	70 H
get_next_line	Read file or input content line by line with buffer management in C.	100	70 H
Born2beroot	Introduction to system administration and virtualization with Linux.	125	40 H
rank 2			
push_swap	Sort a stack with a minimal set of operations using sorting algorithms in C.	84	60 H
A-Maze-ing	Generate and display a functional maze following specific constraints.	100	50 H
Py Module 00	Introduction to Python programming through community garden scenarios.	100	9 H
Py Module 01	Learn Object-Oriented Programming OOP through digital gardening exercises.	100	9 H
Py Module 02	Master exception handling and data pipelines in agricultural systems.	100	9 H
Py Module 03	Explore data structures and streaming pipelines through game analytics.	100	9 H
Py Module 04	Master file operations and error handling in cyberpunk archiving missions.	100	9 H
Py Module 05	Implement method overriding and polymorphism in cyberpunk data systems.	100	9 H
Py Module 06	Master Python's import system and package control via laboratory projects.	100	9 H
Py Module 07	Master abstract classes and interfaces by building a card game engine.	100	9 H
Py Module 08	Master data engineering tools and environments in a Matrix-themed project.	100	9 H
Py Module 10	Master advanced functional programming in a cyberpunk RPG scenario.	100	9 H
Py Module 09	Master data validation with Pydantic through interstellar cosmic exercises.	100	9 H
rank 3			
Call Me Maybe	Implement LLM function calling and constrained JSON decoding.	105	80 H
Codexion	Master concurrent programming using threads and mutexes in C.	100	80 H
Fly-in	Design a drone routing and pathfinding system using OOP principles.	125	120 H
rank 4			
NetPractice	Configure IP routing and subnetting to build functional network connections.	100	50 H
RAG against the machine	Build a RAG system with intelligent data chunking.	110	150 H
Pac-Man	Develop a modern Python implementation of the classic Pac-Man game.	100	150 H

**At 42, project grades are given on a scale from 0 to 100. A grade of 100 reflects full mastery of the project's objectives. Exceptional submissions may receive a bonus, resulting in grades over 100. All evaluations are peer-reviewed and follow strict assessment criteria to ensure fairness and consistency.*

Details of the Curriculum

Founded in 2013, 42 is a global network of ICT schools providing scalable, high-quality software engineering education. Our innovative model emphasizes peer-to-peer learning, project-based and hands-on programming, enabling students to become industry-ready within 2 to 5 years. The curriculum is divided into two parts: the Core Curriculum, after which students may either continue to the Advanced Curriculum or graduate as alumni.

Skills developed during the entire Core Curriculum:

- **Algorithms & AI:** Classic algorithms, data structures, and asynchronous logic.
- **Graphics:** Image manipulation, drawing shapes, and event-driven programming.
- **Group & Interpersonal:** Teamwork, collaboration, and group dynamics.
- **Imperative Programming:** C programming, memory management, and data structures.
- **Object-Oriented Programming:** C++ classes, inheritance, templates, and abstraction.
- **System Programming:** Unix system calls, file handling, and process control.
- **Network & Sysadmin:** Linux system setup, user management, and basic network services.
- **Web:** Full-stack web development, MVC, and UI/UX basics.
